-

★ WHAT TO LEARN FIRST?

If you're a **fresher**, start with:

1 → Generative AI for HR Professionals

Learn the fundamentals and HR use cases.

2 → Generative AI, Recruiting & Talent Acquisition

Build recruitment-specific knowledge.

3 → Generative AI for Recruiters & HR Professionals

Move into practical prompting and HR tools.

4 → AI-Powered People Analytics

Add an analytics angle to your profile.

Skills this can help you demonstrate in interviews:

AI literacy + Prompt Engineering + AI Recruitment + HR Automation + People Analytics + Responsible AI

This combination is much more valuable than simply writing "**ChatGPT**" under your skills.
